Basic synth programming - Creating some patches - Basic synth programming - Creating some patches 14 minutes, 37 seconds - This is just a video about how I go about programming 80s patches for synths in general. In this video I'm using the free VST Odin ...

Let's begin with a pad sound, We start from an init patch

Now let's try and change wave form on the oscillators. This can have a huge impact on the sound. Try. different combinations.

Adjusting the octaves of the oscillators.

Now, let's continue with a bell sound. We start from an init patch again.

Let's try a synthwave bass sound. Again, beginning with an init patch.

Short Attack(A) and short Decay(D). A bit of Release(R)..

The second oscillator one octave lower.

The third oscillator same as the first. Switch to square wave for the lower Oscillator to get the sub oscillator sound that the Juno synths have.

Crank up the filter envelope amount and lower the cutoff.
