

# Database Programming With C

## Object database

object-oriented programming. Object databases are different from relational databases which are table-oriented. A third type, object–relational databases, is a...

## C (programming language)

C is a general-purpose programming language. It was created in the 1970s by Dennis Ritchie and remains widely used and influential. By design, C gives...

## C++

C++ (/ˈsiː plʊz plʊz/, pronounced &quot;C plus plus&quot; and sometimes abbreviated as CPP or CXX) is a high-level, general-purpose programming language created...

## Object–relational database

store for software written in an object-oriented programming language, with an application programming interface API for storing and retrieving objects...

## Program database

Program database (PDB) is a file format (developed by Microsoft) for storing debugging information about a program (or, commonly, program modules such...

## C Sharp (programming language)

C# (/ˈsiː ʃərp/ see SHARP) is a general-purpose high-level programming language supporting multiple paradigms. C# encompasses static typing, 4 strong...

## Fourth-generation programming language

A fourth-generation programming language (4GL) is a high-level computer programming language that belongs to a class of languages envisioned as an advancement...

## Java (programming language)

its release, and has been a popular programming language since then. Java was the third most popular programming language in 2022[update] according to...

## Database

hooks for database design, application programming, application program maintenance, database performance analysis and monitoring, database configuration...

## C/AL

C/AL is a Database specific programming language, and is primarily used for retrieving, inserting and modifying records in a Navision database. C/AL...

## **Objective-C**

Objective-C is a high-level general-purpose, object-oriented programming language that adds Smalltalk-style message passing (messaging) to the C programming language...

## **JADE (programming language)**

consists of the JADE programming language, Integrated development environment and debugger, integrated application server and object database management system...

## **Database abstraction layer**

A database abstraction layer (DBAL or DAL) is an application programming interface which unifies the communication between a computer application and databases...

## **Declarative programming**

science, declarative programming is a programming paradigm, a style of building the structure and elements of computer programs, that expresses the logic...

## **Object-oriented programming**

Object-oriented programming (OOP) is a programming paradigm based on the object – a software entity that encapsulates data and functionality. An OOP program consists...

## **General-purpose programming language**

In computer software, a general-purpose programming language (GPL) is a programming language for building software in a wide variety of application domains...

## **Pro\*C**

Pro\*C (also known as Pro\*C/C++) is an embedded SQL programming language used by Oracle Database DBMSes. Pro\*C uses either C or C++ as its host language...

## **Microsoft Access (category Desktop database application development tools)**

with Book Shelf, Microsoft Access 2.0 was included with first sample databases &quot;NorthWind Trader&quot; which covered every possible aspect of programming a...

## **SQL (redirect from SQL database)**

contained in a relational database. SQL is a set-based, declarative programming language, not an imperative programming language like C or BASIC. However, extensions...

## **Berkeley DB (redirect from Berkeley Database License)**

an embedded database software library for key/value data, historically significant in open-source software. Berkeley DB is written in C with API bindings...
