It is important to lay a comprehensive and strong ...

Introduction In a lay man's language race refers to the classification of human being's, ancestry, its origins and ethnicity. The concept of race has varied across the whole world and has also been subjected to controversy for social, biological and political reasons. Race brings out differences between skin color, language, nationality and religion. The concept of race can be understood in two different landscapes i.e. biological and social. The concept of race provides a frame where all the individuals can be arranged systematically.

Definition Hooton has defined race as a great division of mankind where the members individually vary and are characterized by combinations of morphological and metrical features which are non adaptive and are derived from a common descent. He further divided races into Primary and Secondary. Primary races resulted due to early geographical differentiation and genetic isolation. It resulted by mutation, selection, migration and drift. Secondary races came into existence due to hybridization among the primary races.

II. Cymotrichy or wavy hair: this type is widely distributed among the people of western Asia, some parts of Africa, and Europe. It can also be divided into three types. Broad wavy: This hair type possess waves with smaller radius. Narrow wavy: in this type of hair, the waves like in one plane and has strong curvature. Curly: the spirals present in third type of hair are broad and the curvatures do not lie in one plane.

The colour of the hair is due to some brown or black granular and non granular pigments. The hair shaft consists of three parts namely, the outer layer (unpigmented), cortex and medulla. The cortex consists hair pigments, in some cases it is also found in the medulla. The grey colour in the hair is due to reflection of light from the unpigmented cortex and medullary spaces of the hair shaft. During old age the greyness in hair increases due to increase in the medullary spaces. Environment doesn't have a remarkable affect on the hair colour. Change in colour of hair with an increasing age is evident.

Texture: The texture of a hair strand can be divided into three broad categories namely coarse, medium and fine. The texture of the hair may be found by rubbing it with the help of fingers. Garn has given a classification to study the texture of hair which are as follows: - Fine Hair - 56 - Medium Hair-574-844 - Coarse hair- - 84

Science Says: There Is No Such Thing As Race! - Science Says: There Is No Such Thing As Race! 6 minutes, 30 seconds - According to science **race**, is just an adaptation of humans living in different parts of the world, but **ethnicity**, is very real. Confused?
