

Alinea

Alinea

The debut cookbook from the restaurant Gourmet magazine named the best in the country. A pioneer in American cuisine, chef Grant Achatz represents the best of the molecular gastronomy movement--brilliant fundamentals and exquisite taste paired with a groundbreaking approach to new techniques and equipment. ALINEA showcases Achatz's cuisine with more than 100 dishes (totaling 600 recipes) and 600 photographs presented in a deluxe volume. Three feature pieces frame the book: Michael Ruhlman considers Alinea's role in the global dining scene, Jeffrey Steingarten offers his distinctive take on dining at the restaurant, and Mark McClusky explores the role of technology in the Alinea kitchen. Buyers of the book will receive access to a website featuring video demonstrations, interviews, and an online forum that allows readers to interact with Achatz and his team. \"Achatz is something new on the national culinary landscape: a chef as ambitious as Thomas Keller who wants to make his mark not with perfection but with constant innovation . . . Get close enough to sit down and allow yourself to be teased, challenged, and coddled by Achatz's version of this kind of cooking, and you can have one of the most enjoyable culinary adventures of your life.\" --Corby Kummer, senior editor of Atlantic Monthly \"Someone new has entered the arena. His name is Grant Achatz, and he is redefining the American restaurant once again for an entirely new generation . . . Alinea is in perpetual motion; having eaten here once, you can't wait to come back, to see what Achatz will come up with next.\" --GourmetReviews & Awards James Beard Foundation Cookbook Award Finalist: Cooking from a professional Point of View Category James Beard Foundation Outstanding Chef Award! \"Even if your kitchen isn't equipped with a paint-stripping heat gun, thermocirculator, or refractometer, and you're only vaguely aware that chefs use siphons and foams in contemporary cooking, you can enjoy this daring cookbook from Grant Achatz of the Chicago restaurant Alinea. . . While the recipes can hardly become part of your everyday cooking, this book is far too interesting to be left on the coffee table. As you read, a question emerges: Is Alinea's food art? . . . I go a little further, describing Achatz with a word that he would probably never use to describe himself: avant-garde, as it defined art movements at the beginning of the last century--planned, self-conscious, and structured attempts to provoke and shake the status quo. Just as with those artists, the results are not necessarily as interesting as the intentions and concepts behind them. In this sense, this volume constitutes a full-blown although not threatening manifesto.\"—Art of Eating

The Alinea Project

A photographic memoir detailing the process of cooking every dish in the Alinea cookbook.

Zero

An award-winning chef describes how he lost his sense of taste to cancer, a setback that prompted him to discover alternate cooking methods and create his celebrated progressive cuisine.

Life, on the Line

Multimodal transport network customers need to be directed during their travels. A travel support tool can be offered by a Multimodal Information System (MIS), which allows them to input their needs and provides them with the appropriate responses to improve their travel conditions. The goal of this book is to design and develop methodologies in order to realize a MIS tool which can ensure permanent multimodal information availability before and during travel, considering passengers' mobility. The authors propose methods and tools that help transport network customers to formulate their requests when they connect to their favorite

information systems through PC, laptop, cell phone, Portable Digital Assistant (PDA), etc. The MIS must automatically identify the websites concerning the customer's services. These sites can, in fact, represent transport services, cultural services, tourist services, etc. The system should then be able to collect the necessary travel information from these sites in order to construct and propose the most convenient information according to the user's requests. Contents 1. Agent-oriented Road Traffic Simulation, René Mandiau, Sylvain Piechowiak, Arnaud Doniec and Stéphane Espié. 2. An Agent-based Information System for Searching and Creating Mobility-aiding Services, Slim Hammadi and Hayfa Zgaya. 3. Inter-vehicle Services and Communication, Sylvain Lecomte, Thierry Delot and Mikael Desertot. 4. Modeling and Control of Traffic Flow, Daniel Jolly, Boumediene Kamel and Amar Benasser. 5. Criteria and Methods for Interactive System Evaluation: Application to a Regulation Post in the Transport Domain, Houcine Ezzedine, Abdelwaheb Trabelsi, Chi Dung Tran and Christophe Kolski.

Treaties and Other International Acts Series

This important book focuses on passenger and freight transportation modes: policy analysis, formulation and evaluation; planning; interaction with the political, socioeconomic and physical environment; design, management and evaluation of transportation systems.

Advanced Mobility and Transport Engineering

The understanding of empirical traffic congestion occurring on unsignalized multi-lane highways and freeways is a key for effective traffic management, control, organization, and other applications of transportation engineering. However, the traffic flow theories and models that dominate up to now in transportation research journals and teaching programs of most universities cannot explain either traffic breakdown or most features of the resulting congested patterns. These theories are also the basis of most dynamic traffic assignment models and freeway traffic control methods, which therefore are not consistent with features of real traffic. For this reason, the author introduced an alternative traffic flow theory called three-phase traffic theory, which can predict and explain the empirical spatiotemporal features of traffic breakdown and the resulting traffic congestion. A previous book "The Physics of Traffic" (Springer, Berlin, 2004) presented a discussion of the empirical spatiotemporal features of congested traffic patterns and of three-phase traffic theory as well as their engineering applications. Rather than a comprehensive analysis of empirical and theoretical results in the field, the present book includes no more empirical and theoretical results than are necessary for the understanding of vehicular traffic on unsignalized multi-lane roads. The main objectives of the book are to present an "elementary" traffic flow theory and control methods as well as to show links between three-phase traffic theory and earlier traffic flow theories. The need for such a book follows from many comments of colleagues made after publication of the book "The Physics of Traffic".

Transportation Research Trends

This monograph provides an extended overview of modelling and control approaches for freeway traffic systems, moving from the early methods to the most recent scientific results and field implementations. The concepts of green traffic systems and smart mobility are addressed in the book, since a modern freeway traffic management system should be designed to be sustainable. Future perspectives on freeway traffic control are also analysed and discussed with reference to the most recent technological advancements. The most widespread modelling and control techniques for freeway traffic systems are treated with mathematical rigour, but also discussed with reference to their performance assessment and to the expected impact of their practical usage in real traffic systems. In order to make the book accessible to readers of different backgrounds, some fundamental aspects of traffic theory as well as some basic control concepts, useful for better understanding the addressed topics, are provided in the book. This monograph can be used as a textbook for courses on transport engineering, traffic management and control. It is also addressed to experts working in traffic monitoring and control areas and to researchers, technicians and practitioners of both transportation and control engineering. The authors' systematic vision of traffic modelling and control

methods developed over decades makes the book a valuable survey resource for freeway traffic managers, freeway stakeholders and transportation public authorities with professional interests in freeway traffic systems. Advances in Industrial Control reports and encourages the transfer of technology in control engineering. The rapid development of control technology has an impact on all areas of the control discipline. The series offers an opportunity for researchers to present an extended exposition of new work in all aspects of industrial control.

United States Treaties and Other International Agreements

EduGorilla Publication is a trusted name in the education sector, committed to empowering learners with high-quality study materials and resources. Specializing in competitive exams and academic support, EduGorilla provides comprehensive and well-structured content tailored to meet the needs of students across various streams and levels.

Introduction to Modern Traffic Flow Theory and Control

Eleven Madison Park is one of New York City's most popular fine-dining establishments, where Chef Daniel Humm marries the latest culinary techniques with classical French cuisine. Under the leadership of Executive Chef Daniel Humm and General Manager Will Guidara since 2006, the restaurant has soared to new heights and has become one of the premier dining destinations in the world. Eleven Madison Park: The Cookbook is a sumptuous tribute to the unforgettable experience of dining in the restaurant. The book features more than 125 sophisticated recipes, arranged by season, adapted for the home cook, and accompanied by stunning full-color photographs by Francesco Tonelli.

Freeway Traffic Modelling and Control

The Academy is a prestigious international institution for the study and teaching of Public and Private International Law and related subjects. The work of the Hague Academy receives the support and recognition of the UN. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the \"Collected Courses of the Hague Academy of International Law .

Introduction to Modern Traffic Flow Theory and Control

This book offers a comparative perspective on 18 countries' legal regulation of crowdfunding. In the wake of the financial crises of 2008, use of this alternative financing method has increased substantially, in various forms. Whereas some states have adopted tailor-made regimes in order to regulate but also encourage this way of financing projects, allowing loans to be made by non-banking institutions, others still haven't specifically addressed the subject. An analysis of these diverse legislative stances offers readers a range of legal solutions for managing crowdfunding activities with regard to e.g. protecting investors, imposing limits on project owners, and finally the role and duties of intermediaries, i.e., companies operating crowdfunding platforms. In addition, the content presented here provides a legal basis for states and supranational organizations interested in regulating this phenomenon to achieve more legal certainty.

Eleven Madison Park

He only wanted to visit his father's dig. He never expected to vanish through an alien altar. Mike's holiday turns surreal when his father goes missing--and a mysterious artifact flings Mike and his friend Alinea into a strange, desolate world. There, the only certainty is danger. Alien slave traders, telepathic creatures, and

flickers of impossible memory stalk their path. They're not just lost on another planet--they're out of time. With Alinea's visions growing stronger and a fierce, scaled creature named Beeper joining their side, Mike must fight to survive... and uncover the link between his father's disappearance and the secret of the Altar of Shulaani. Fast-paced, otherworldly, and deeply imaginative, this is the first book in a sci-fi trilogy where reality bends and courage is everything.

Lettres, instructions et mémoires

The four volumes of the encyclopedia of Cameroon aviation law are intended for students, lawyers, judges, scholars, and readers of all backgrounds with an interest in aviation law and to provide the definitive corpus of relevant national and regional legislation, including global aviation treaties and legislation, to enable all readers, without exception, to develop the background, knowledge, and tools to understand local, regional, and international aviation law in a contextual fashion. The first volume has a detailed text of country legislation, including national cases and materials, while the second volume focuses on international aviation law treaties, international cases and materials, and Aircraft Refueling Indemnity (Tarbox) Agreements.

Bulletin

These proceedings collect selected papers from the 7th International Conference on Green Intelligent Transportation System and Safety held in Nanjing on July 1-4, 2016. The selected works, which include state-of-the-art studies, are intended to promote the development of green mobility and intelligent transportation technology to achieve interconnectivity, resource sharing, flexibility and higher efficiency. They offer valuable insights for researchers and engineers in the fields of Transportation Technology and Traffic Engineering, Automotive and Mechanical Engineering, Industrial and System Engineering, and Electrical Engineering.

Recueil Des Cours, Collected Courses, 1975

This title is one of the most important documents in the establishment of the Permanent Court of International Justice (1920-1946). Because the Statute of the Permanent Court was taken over by the International Court of Justice (since 1945) nearly unchanged, it remains of enormous practical and scholarly importance today. In effect, this is the only documentary evidence we have of the drafters' train of thought. More than a historical document, this title is a most important tool in the interpretation of the Statute of the ICJ. Between 16 June and 24 July 1920 an international group of ten distinguished jurists including Elihu Root, Albert de Lapradelle and Lord Phillimore held 35 meetings in the Peace Palace in The Hague to draft the statute for the Permanent Court of International Justice (PCIJ) of the League of Nations. The *Procès-Verbaux* documents the proceedings of these sessions. The Annexes contain the texts of relevant supporting documents, including early drafts of the statute. With index. Not widely available at university libraries.

Legal Aspects of Crowdfunding

"One of America's great chefs\" (Vogue) shares how his drive to cook immaculate food won him international renown-and fueled his miraculous triumph over tongue cancer. In 2007, chef Grant Achatz seemingly had it made. He had been named one of the best new chefs in America by Food & Wine in 2002, received the James Beard Foundation Rising Star Chef of the Year Award in 2003, and in 2005 he and Nick Kokonas opened the conceptually radical restaurant Alinea, which was named Best Restaurant in America by Gourmet magazine. Then, positioned firmly in the world's culinary spotlight, Achatz was diagnosed with stage IV squamous cell carcinoma-tongue cancer. The prognosis was grim, and doctors agreed the only course of action was to remove the cancerous tissue, which included his entire tongue. Desperate to preserve his quality of life, Grant undertook an alternative treatment of aggressive chemotherapy and radiation. But the choice came at a cost. Skin peeled from the inside of Grant's mouth and throat, he rapidly lost weight, and most alarmingly, he lost his sense of taste. Tapping into the discipline, passion, and focus of being a chef,

Grant rarely missed a day of work. He trained his chefs to mimic his palate and learned how to cook with his other senses. As Kokonas was able to attest: The food was never better. Five months later, Grant was declared cancer-free, and just a few months following, he received the James Beard Foundation Outstanding Chef in America Award. *Life, on the Line* tells the story of a culinary trailblazer's love affair with cooking, but it is also a book about survival, about nurturing creativity, and about profound friendship. Already much-anticipated by followers of progressive cuisine, Grant and Nick's gripping narrative is filled with stories from the world's most renowned kitchens-The French Laundry, Charlie Trotter's, el Bulli- and sure to expand the audience that made *Alinea* the number-one selling restaurant cookbook in America last year. Watch a Video

Altar of Shulaani

Arabic letters on papyrus challenge the modern reader. There are few to no diacritical dots to distinguish homographs, no systematic spacing between single words, and in the majority of cases a low degree of graphical structuring. However, contemporary readers usually read and understood these documents easily - probably because the recipient of a letter knew what to expect. The letters are formulaic, and their information packaging follows an algorithm typical for their time and content. Here formulaic letter writing means not only the reuse of the same formulae or topoi but expressing thoughts in a predictable linguistic way and order, both as a matter of readability and as one of adequacy and politeness. The main concern of this work is to discover these unwritten rules and norms behind Arabic letter writing on papyrus.

Tijdschrift Voor Sociale Hygiene

L'idée d'entreprendre une édition critique des *Regulce ad directionem ingenii* s'est imposée à nous pendant que nous préparions un commentaire de ce traité inachevé de Descartes. Le texte établi par Ch. Adam nous a, plus d'une fois, inspiré certains doutes, qui nous invitaient à vérifier les sources. C'est ainsi que nous avons été amenés à prendre en considération la version hollandaise du XVII^e siècle, que l'éditeur de Descartes avait complètement négligée. La collation du manuscrit de Hanovre avec l'édition princeps d'Amsterdam et l'examen de la version hollandaise nous ont permis de faire des retouches, quelquefois importantes, à l'édition Adam. Nous tenons à remercier de leurs précieux conseils les Professeurs Dr. E.W. Beth, Dr. E. Garin, Dr. F.L.R. Sassen, le Dr. F. Veenstra, et tout particulièrement le Prof. Dr. P. Dibon, dont l'infatigable assistance nous a été très précieuse surtout dans la dernière phase de nos travaux. Nous sommes, en outre, très reconnaissant à M. le Directeur de la Niedersächsische Landesbibliothek de Hanovre pour le manuscrit qu'il a mis à notre disposition, et à M. le Directeur de l'Universiteitsbibliotheek d'Amsterdam pour l'exemplaire de la version hollandaise dont il nous a permis de publier le texte. Nous devons à Madame F. van Rossum-Guyon d'avoir rendu possible la traduction en français.

Encyclopaedia of International Aviation Law

This monograph is devoted to a new approach to an old field of scientific investigation, freeway traffic research. Freeway traffic is an extremely complex spatiotemporal nonlinear dynamic process. For this reason, it is not surprising that empirical traffic pattern features have only recently been sufficiently understood. Such empirical features are in serious conflict with almost all earlier theoretical and model results. Consequently, the author introduced a new traffic flow theory called "three-phase traffic theory," which can explain these empirical spatiotemporal traffic patterns. The main focus of this book is a consideration of empirical spatiotemporal traffic pattern features, their engineering applications, and explanations based on the three-phase traffic theory. The book consists of four parts. In Part I, empirical studies of traffic flow patterns, earlier traffic flow theories, and mathematical models are briefly reviewed. Three-phase traffic theory is considered as well. This theory is a qualitative theory. Main ideas and results of the three-phase traffic flow theory will be introduced and explained without complex mathematical models. This should be suitable for a very broad audience of practical engineers, physicists, and other readers who may not necessarily be specialists in traffic flow problems, and who may not necessarily have worked in the field of spatiotemporal pattern formation. In Part II, empirical spatiotemporal traffic pattern features are considered. A microscopic

three-phase traffic theory of these patterns and results of an application of the pattern features to engineering applications are presented in Part III and Part IV, respectively.

Quellen Des Internationalen Einheitsrechts

The past was buried. The Kloog were forgotten. But nothing stays lost forever. In their last attempt to rescue Mike's father, Mike, Alinea, and Beeper are captured by Federation forces--and drawn into a journey none of them expected. Trapped aboard a Way Station ship bound for the Intergalactic Lost Property Office, their only escape lies in trusting a strange alien named Quok and the malfunctioning systems of a drifting starliner. But even freedom leads to danger. The more Mike learns about the mysterious Kloog--an ancient species wiped from memory--the more he suspects the truth has been buried on purpose. And now, someone wants it uncovered... or destroyed. A thrilling finale that reveals the true stakes behind the Altar of Shulaani--and the cost of awakening forgotten power.

Green Intelligent Transportation Systems

Building upon Timothy Ferriss's internationally successful \"4-hour\" franchise, The 4-Hour Chef transforms the way we cook, eat, and learn. Featuring recipes and cooking tricks from world-renowned chefs, and interspersed with the radically counterintuitive advice Ferriss's fans have come to expect, The 4-Hour Chef is a practical but unusual guide to mastering food and cooking, whether you are a seasoned pro or a blank-slate novice.

Record of the Batasan

The Yearbook of the European Convention on Human Rights, edited by the Directorate General of Human Rights and Legal Affairs, is an indispensable record of the development and impact of the world's oldest binding international human rights treaty. It reviews the implementation of the Convention both by the European Court of Human Rights and by the Council of Europe's Committee of Ministers, responsible for supervising the application of the Court's judgments in the member states. The Yearbook includes: Full text of any new protocols to the Convention as they are opened for signature, together with the state of signatures and ratifications. Full listing of Court judgments; judgments broken down by subject-matter; and extensive summaries of key judgments handed down by the Court during the year. Selected human rights (DH) resolutions adopted as part of the Committee of Ministers' work supervising the execution of the Court's judgments. Enquiries by the Secretary General carried out under Article 52 of the Convention. Other work of the Council of Europe connected with the European Convention on Human Rights, carried out by the Committee of Ministers, the Parliamentary Assembly, and the Directorate General of Human Rights and Legal Affairs. Bibliographic information from the library of the European Court of Human Rights. The Yearbook is published in an English-French bilingual edition.

Procès-verbaux Des Séances Du Comité, 16 Juin-24 Juillet 1920, Avec Annexes

This book provides an ideal introduction to the French legal system and its internal workings, replete with the latest case law and developments.
