

20 Ruby Franke

The House of My Mother

INSTANT #1 NEW YORK TIMES BESTSELLER “Heart-wrenchingly personal...dizzying.” —Rolling Stone From eldest daughter Shari Franke, the shocking true story behind the viral 8 Passengers family vlog and the hidden abuse she suffered at the hands of her mother, and how, in the face of unimaginable pain, she found freedom and healing. Shari Franke’s childhood was a constant battle for survival. Her mother, Ruby Franke, enforced a severe moral code while maintaining a façade of a picture-perfect family for their wildly popular YouTube channel 8 Passengers, which documented the day-to-day life of raising six children for a staggering 2.5 million subscribers. But a darker truth lurked beneath the surface—Ruby’s wholesome online persona masked a more tyrannical parenting style than anyone could have imagined. As the family’s YouTube notoriety grew, so too did Ruby’s delusions of righteousness. Fueled by the sadistic influence of relationship coach Jodi Hildebrandt, together they implemented an inhumane and merciless disciplinary regime. Ruby and Jodi were arrested in Utah in 2023 on multiple charges of aggravated child abuse. On that fateful day, Shari shared a photo online of a police car outside their home. Her caption had one word: “Finally.” For the first time, Shari will reveal the disturbing truth behind 8 Passengers and her family’s devastating involvement with Jodi Hildebrandt’s cultish life coaching program, “ConneXions.” No stone is left unturned as Shari exposes the perils of influencer culture and shares for the first time her battle for truth and survival in the face of her mother’s cruelty.

The Immersive Worlds Handbook

Scott Lukas, famed industry expert on designing themed spaces, brings you a book that focuses on the imaginative world of themed, immersive and consumer spaces. Whether or not you are involved in designing a theme park, cultural museum, shop, or other entertainment space, you will benefit from the insider tips, experiences, and techniques highlighted in this practical guide. Make your themed spaces come to life and become true, immersive worlds. The book features informative sidebars addressing possible design issues and current trends; case studies and interviews with real-world designers, and further reading suggestions. The book also includes a companion website, as well as exercises that accompany each chapter, lavish photos, illustrations, and tables.

Summary of Shari Franke's The House of My Mother

Buy now to get the main key ideas from Shari Franke's The House of My Mother In The House of My Mother (2025), Shari Franke reveals the harrowing truth about her upbringing and the abuse she and her five siblings endured. Shari’s mother Ruby portrayed a wholesome family life to the 2.5 million people subscribed to the 8 Passengers YouTube channel. Behind the camera, however, she imposed cruel and inhumane punishments while exploiting her children for online content. Her involvement with life coach Jodi Hildebrandt exacerbated family tensions, promoting a philosophy of control and isolation. In 2023, Ruby and Jodi were arrested for aggravated child abuse. The House of My Mother uncovers the dangers of influencer culture, Ruby’s tyranny, and Shari’s fight for freedom and healing.

The Teen's Guide to Social Media... and Mobile Devices

Ever regret something you’ve posted? Honestly? How smart are you being when it comes to streaming, messaging, gaming, commenting. . .? The Teen’s Guide to Social Media & Mobile Devices will help you navigate the digital world with 21 refreshingly honest and humorous tips that will not only inform, but that

also just might change the way you think about your social media interaction. 21 real-life tips including. . . Know the app before you snap. Don't post anything you wouldn't want Grandma, your boss, and Jesus seeing! (Jesus is on Insta, you know!) Peek at your privacy settings. . .so you know who's peeking at you. Take more "selflessies." Press pause before you post. . .and many more will provide just the information you need to post wisely in an insecure world.

Sculpt Yourself

Synopsis: Lipamorph is a drug that lets you sculpt yourself. It's how so many female celebrities in the mid-2010s remained so thin while having such large butts. It loosens up the fat in your body, allowing you to choose your proportions. And it's just been legalized for sale in Chicago. Amber is a 24-year-old tech support worker by day, gay feminist blogger (and bad-sitcom aficionado) by night. She's been vocal about her disapproval of Lipamorph from the beginning, seeing it as another tool to reinforce patriarchal beauty standards; but as Lipamorph becomes more common, Amber's dissenting voice starts to matter less and less. Judie is Amber's younger sister, and seemingly her complete opposite; she loves pop music, pretty latte art, and dating men. After struggling with hating her body for most of her life, Judie has become borderline reliant on Lipamorph for self-confidence, much to Amber's dismay. Kelly is an artist currently working for the marketing firm on the floor above Amber's office. She's whip-smart, proudly bisexual, and strikingly beautiful ... and she's the woman Amber's fallen in love with. Told from these three women's points of view, *Sculpt Yourself* tackles body image, LGBT+ topics, and what it means to be a feminist in the 21st century

Twenty Largest Stockholders of Record in Member Banks of the Federal Reserve System

The Golden Gate Bridge is one of the most recognizable structures to define a modern city. Yet, for author Kevin Hines the bridge is not merely a marker of a place or a time. Instead, the bridge marks the beginning of his remarkable story. At 19 years old, Kevin attempted to take his own life by jumping off the Golden Gate Bridge - a distance which took four seconds to fall. Recently diagnosed with bi-polar disorder, Kevin had begun to hear voices telling him he had to die, and days before his attempt, he began to believe them. The fall would break his body, but not his spirit. His story chronicles the extraordinary will of the author to live mentally well in the face of his mental illness: bipolar disorder with psychotic features. With each mental breakdown, however, the author's desire to live mentally well-- and to be a mental health advocate-- pulls him from the depths of his condition. Kevin's story is a remarkable testament to the strength of the human spirit and a reminder to us to love the life we have. His story also reminds us that living mentally well takes time, endurance, hard work, and support. With these disciplines in place, those living with even very difficult diagnoses can achieve better lives for themselves and those who help to support and care for them.

Cracked, Not Broken

By the second half of the twentieth century, a new branch of materials science had come into being — crystalline materials research. Its appearance is linked to the emergence of advanced technologies primarily based on single crystals (bulk crystals and films). At the turn of the last century, the impending onset of the “ceramic era” was forecasted. It was believed that ceramics would play a role comparable to that of the Stone or Bronze Ages in the history of civilization. Naturally, such an assumption was hypothetical, but it showed that ceramic materials had evoked keen interest among researchers. Although sapphire traditionally has been considered a gem, it has developed into a material typical of the “ceramic era.” Widening the field of sapphire application necessitated essential improvement of its homogeneity and working characteristics and extension of the range of sapphire products, especially those with stipulated properties including a preset structural defect distribution. In the early 1980s, successful attainment of crystals with predetermined characteristics was attributed to proper choice of the growth method. At present, in view of the fact that the requirements for crystalline products have become more stringent, such an approach tends to be insufficient. It is clear that one must take into account the physical–chemical processes that take place during the

formation of the real crystal structure, i.e., the growth mechanisms and the nature and causes of crystal imperfections.

Sapphire

While many people have come to question the claims of Travis Walton, many others are embracing the quasi-cult of Steven Greer. This writing explores these topics from a Christian perspective.

The UFO/UAP/Alien Headlines: The Fall of Travis Walton and the Rise of Steven Greer

This book is a concise informative elucidation of all aspects of reproduction and development in annelids covering from arenicola to tubifex. Annelids flourish between 4,900 m depth to 2,000 m altitude; some of them occur in unusual habitats like hydrothermal vents and subterranean aquatic system (stygobionts). A few have no gut and acquire adequate nutrients through osmotrophism and/or engaging symbiotic microbes. In the absence of exoskeleton to escape predation, the 17,000 speciose annelids have explored bewildering modes of reproduction; not surprisingly, 42–47% of them are brooders. With 13,000 species, polychaetes are gonochores but some 207 species of them are hermaphrodites. Clitellates are all hermaphrodites; of them, 76 species are parthenogens, of which 56 are earthworms. Regenerative potency of annelids ranges from an organ to an entire worm from a single ‘seminal’ segment. The head, tail and both together can be regenerated 21, 42 and 20 times, respectively. However, the potency is limited to ~1% of polychaetes and Heterogametic sex determination is reported to occur only in six polychaete species, although karyotype is known for 83 annelid species. In temperate polychaetes, a dozen neuroendocrines, arising mostly from the ‘brain’ regulates reproductive cycle. A complete chapter devoted to vermiculture, (i) recognizes the fast-growing candidate species, (ii) distinguishes ‘layers’ from ‘brooders’, (iii) indicates that the harvest of oligochaetes may reduce the input of nitrogenous fertilizer in the ricefield, and (iv) explores the scope for increasing wealth from waste.

Reproduction and Development in Annelida

In this Dossier, Author and Publisher Luke E Dumas exposes the Systematic Violations by the Network of Racists, Environmental Polluters, and Public Fraud currently operating at the Long Beach Airport. Review raw data scrubbed by the FAA in order to cover up the stalking program. And Author Dumas combines the most relevant and comprehensive research known to the public to date.

Long Beach Airport

This collection of beautiful black and white photography brings an authentic Yosemite experience to the viewer and shows a wide breadth of activities in the park. Paired with the photographs are diverse and personal memories, stories, and interviews from people with a deep connection to the park. Readers will enjoy this historic book that combines photography with compelling narrative, bringing the beauty of Yosemite to life in a unique way.

Annual Report

This booklet discusses the subjects of special revelation and the spiritual/metaphysical. It is written from a fundamental Christian outlook.

Specifications and Drawings of Patents Issued from the United States Patent Office

u200bThis book is about how teachers can use classroom mathematics tasks to support student learning, and

presents data on the ways in which teachers used those tasks in a particular research project. It is the product of research findings focusing on teacher practice, teacher learning and knowledge, and student learning. It demonstrates how teachers can use mathematics tasks to promote effective student learning.

Yosemite People

Now a Netflix original series! *Unorthodox* is the bestselling memoir of a young Jewish woman's escape from a religious sect, in the tradition of Ayaan Hirsi Ali's *Infidel* and Carolyn Jessop's *Escape*, featuring a new epilogue by the author. As a member of the strictly religious Satmar sect of Hasidic Judaism, Deborah Feldman grew up under a code of relentlessly enforced customs governing everything from what she could wear and to whom she could speak to what she was allowed to read. Yet in spite of her repressive upbringing, Deborah grew into an independent-minded young woman whose stolen moments reading about the empowered literary characters of Jane Austen and Louisa May Alcott helped her to imagine an alternative way of life among the skyscrapers of Manhattan. Trapped as a teenager in a sexually and emotionally dysfunctional marriage to a man she barely knew, the tension between Deborah's desires and her responsibilities as a good Satmar girl grew more explosive until she gave birth at nineteen and realized that, regardless of the obstacles, she would have to forge a path—for herself and her son—to happiness and freedom. Remarkable and fascinating, this "sensitive and memorable coming-of-age story" (*Pittsburgh Post-Gazette*) is one you won't be able to put down.

Marquis Who's Who Index to Who's Who Books

The most comprehensive, authoritative and widely cited reference on photovoltaic solar energy Fully revised and updated, the Handbook of Photovoltaic Science and Engineering, Second Edition incorporates the substantial technological advances and research developments in photovoltaics since its previous release. All topics relating to the photovoltaic (PV) industry are discussed with contributions by distinguished international experts in the field. Significant new coverage includes: three completely new chapters and six chapters with new authors device structures, processing, and manufacturing options for the three major thin film PV technologies high performance approaches for multijunction, concentrator, and space applications new types of organic polymer and dye-sensitized solar cells economic analysis of various policy options to stimulate PV growth including effect of public and private investment Detailed treatment covers: scientific basis of the photovoltaic effect and solar cell operation the production of solar silicon and of silicon-based solar cells and modules how choice of semiconductor materials and their production influence costs and performance making measurements on solar cells and modules and how to relate results under standardised test conditions to real outdoor performance photovoltaic system installation and operation of components such as inverters and batteries. architectural applications of building-integrated PV Each chapter is structured to be partially accessible to beginners while providing detailed information of the physics and technology for experts. Encompassing a review of past work and the fundamentals in solar electric science, this is a leading reference and invaluable resource for all practitioners, consultants, researchers and students in the PV industry.

Report on Research at AFCRL.

An index to the biographies of women musicians of all periods and countries, as found in a representative selection of dictionaries, and encyclopedias. This update also includes non-musical sources, such as general biographical sets.

Great Exhibition of the Works of Industry of All Nations, 1851

List for March 7, 1844, is the list for September 10, 1842, amended in manuscript.

Transcript of Enrollment Books

Over the past thirty years Ariane Mnouchkine's 'Théâtre du Soleil' has become one of the most celebrated companies in Europe, and Mnouchkine one of its best-known directors. Collaborative Theatre is the first in-depth sourcebook in English on 'Théâtre du Soleil', providing English readers with first-hand accounts of the development of its collectivist practices and ideals. Collaborative Theatre presents critical and historical essays by theatre scholars from around the world as well as the writings of and interviews with members of le Théâtre du Soleil, past and present. Projects discussed include: 1789, L'Age d'Or, Richard II, L'Indiade and Les Atrides.
